

Rely on ModSpace to bring you flexible space solutions.

Our MODULAIRE® Enclosures are an innovative option to satisfy virtually any equipment enclosure need. Whether you want permanent, portable or expandable options, MODULAIRE is a smart choice to maximize your space.

Made of pre-engineered fiberglass components, these revolutionary structures offer the ultimate in design flexibility. From traditional 8'x8' storage to an endless variety of custom configurations, MODULAIRE's fiberglass components provide you with infinite choices to fulfill your design challenges.

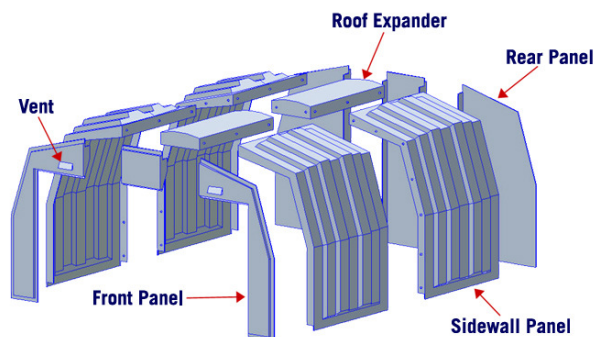

With MODULAIRE Equipment Enclosures you get a durable, lightweight and attractive space solution that stands up to the environment and meets Universal Building Code requirements. MODULAIRE brings you extraordinary benefits, including:

- Structural design flexibility
- Minimal maintenance
- Durability
- Expandable components
- Easy relocation
- Interior/exterior customization options

Design Flexibility

Innovative fiberglass components make a wide variety of design configurations readily available to you.

MODULAIRE's component based building system allows for easy expansion or contraction, so you can increase or decrease your space as needs change. Sidewall panels are available to accommodate customized options such as roll-up or man doors and windows. Front and rear panels can also be modified to meet your design needs.

Components of a 10' Wide by 8' Long Enclosure

Variety

Why settle for the constrictions of traditional storage methods when you can have a solution tailored to your equipment needs? With MODULAIRE, you can opt for 8', 10', 12', 16' or 20' wide structures. The standard gambrel panel height is 9' tall, providing 8'x2" clearance under the peak. Length design is equally flexible, with 4'-long side panels allowing for growth in 4' increments.

Customized Options

Choose value-added accessories to maximize your building's usefulness. Additional components are available such as heaters, lights, vents, fans and utility boxes that can be either glued or screwed into the interior surface of your insulated fiberglass panels.

Call your local sales specialist today for a needs assessment. With nearly 40 years of modular industry experience, ModSpace has the planning and design expertise to successfully implement your project.
